Task 1

Self-Introduction

Thanks for giving me an opportunity to introduce myself to you. I am Rohith K and I live in Hyderabad with my family—my mother and father. I am originally from Kerala but completed most of my education from Hyderabad. I completed my school in Army public school RK Puram and KV picket.

Then pursued BTech in electrical engineering with a from CVR college of engineering,

Since my school days, I have been quite passionate about computers and always wanted to work on new software's that where coming out all the time I decided to switch to It

I joined Capgemini on 13th September, and I have undergone training in Java Full stack with angular. But as my preferences always was with react, I switched to it. I completed a bootcamp with the team in which, we made a vegetable online store. In this the client could order the vegetables which in-turn would reduce the number of vegetables in the site and the number of vegetables could only be added by managers. Through this bootcamp I was able to learn a lot about on how to work as a team and learnt a lot about spring boot and react.

Talking about my hobbies and interests, I love Basketball and captained my college to various trophies. I was the sports captain in my school. We have won quite a lot of inter-school and in have brought them back to the school.
